## **ABSTRACT**

A platform that provides convenience to traders in the decision of buying and selling crypto currency which reduces the impact of losses. In addition we also offer any trader who are interested in learning class analysis techniques so they can perform their own analysis. This way does not reduce anxiety for traders who had entered into the world of crypto currency so there is no difference between a novice trader with expert traders. Our platform can save time in trading, with traders joining us simply login and choose a coin which one to buy and know when to sell.

With the growing development of digital money circulating on the global market, it has become a magnet for the public to plunge into the world of crypto. But due to lack of experience in trading and lack of insight into the digital currency raises innumerable losses. Therefore, with the project this STCOIN new trader will not hesitate even make the same mistakes. STCOIN comes with a platform that allows the trader to buy sell a coin entry. STCOIN Project also aims to provide learning spaces for beginners to understand analysis techniques coin correctly.

STCOIN also will innovate even more to benefit the global community, we will keep working on this project for the usefulness of various things. The utility of STCOIN :

1. Trading in the Market.

STCOIN also can be traded on the market, the current market is in WAVESDEX and will be developed into other market.

2. Signal Trader Platform Paying Coin.

To get a signal trader must pay to use the Token STCOIN

3. Paying Online Course.

This STCOIN Project open learning classes Technical analysis, also using STCOIN payment.

4. Payment for Channel Signal

STCOIN can be used as a paid channel payment tool with third parties outside the SignalTrading Coin platform.

## Signal Trader Platform Feature

---

Project that we have developed is a platform where traders can perform their own analysis.

Here are the advantages of the platform that we provide;

1. Trading simulator

Aims to facilitate traders to analyze before plunging into the global market. There is a balance in the simulator demo that can not only serve as a fund Pull funding for simulators buy / sell. This way the trader does not fear lost in trading.

2. Chart & Indicators

In this platform we provide realtime price movement chart of the coin / token that is global market. There are also a variety of indicators to facilitate the analysis itself.

3. Professional Online Course

Trader can participate in online learning guidance contained our platform, as well as information about market news. There is also a test to measure the how far our members receive the education they provide.

4. Online Certificate Course

For traders who pass the online test course in our platform presents a certificate of appreciation to our members

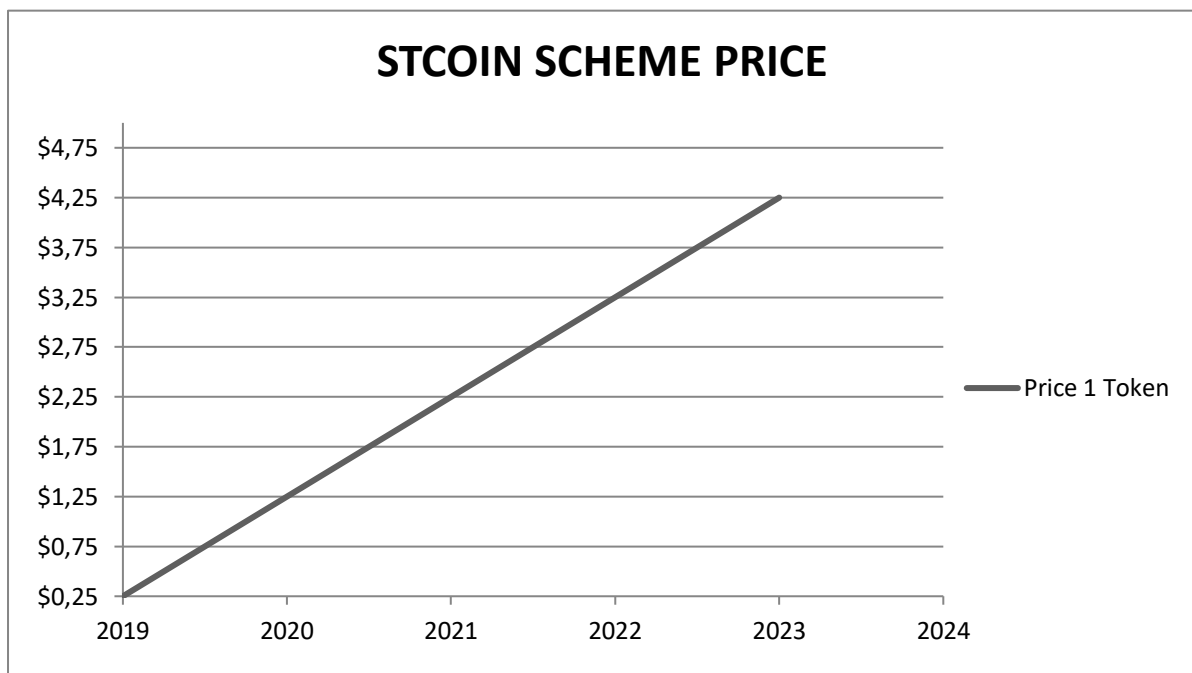

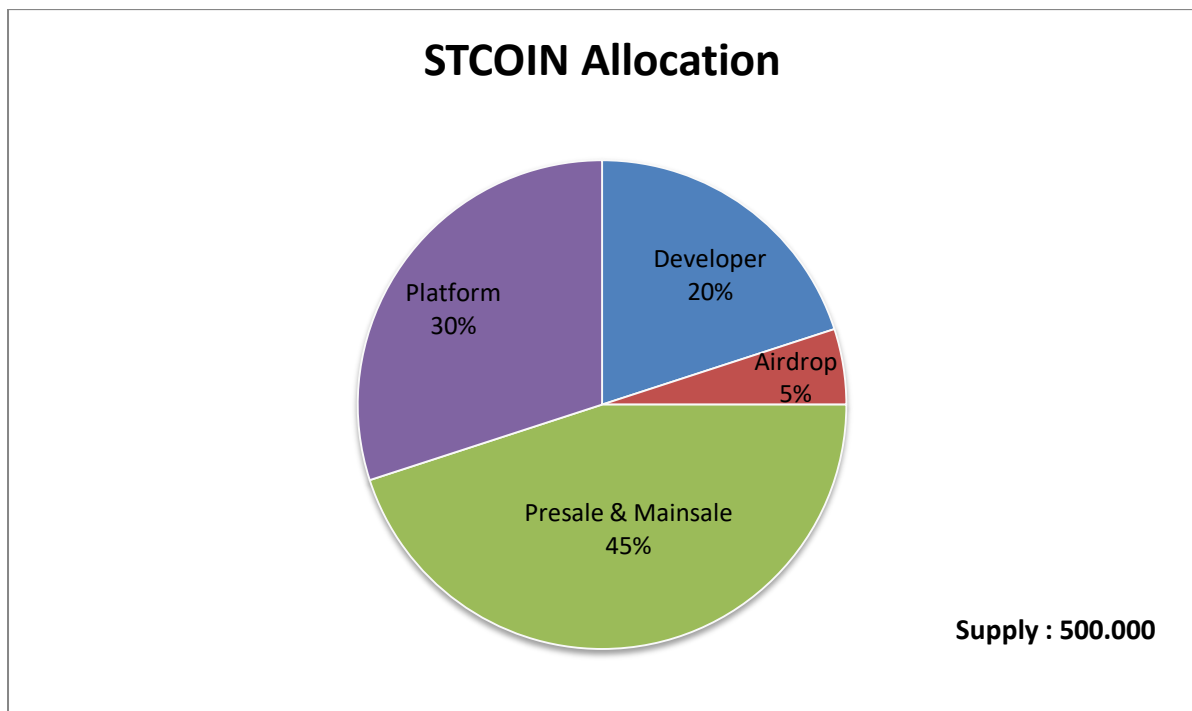

5. Mobile App

With the Mobile App can facilitate traders to follow all that is platform us anywhere at any time.

6. Security & Service

Traders do not need to fear the presence of a hacker attack, therefore we provide security and comfort. We also provide our best services to the satisfaction of our members.
